

**Fact sheet short description**

The capabilities and the process methodologies employed by ValueSource India for the Delivery -Application Development are highlighted in this fact Sheet

**About Us**

ValueSource India currently offers application development services to KBC group, one of the largest banking & insurance groups in Europe.

**Delivery AD**

Our Application development (AD) practice provides custom solutions, enabling clients to achieve competitive advantage and cost savings. Our AD practice leverages various technologies, techniques and process methodologies for outstanding solution design and delivery. Our End-to-end AD services strategy includes capability to provide solutions during the various application development stages for the end-user, either in part or on an end-to-end basis.

The basic formats in which AD services are handled by VST include a mix of onsite and Offshore services in the various stages of Software Development Life Cycle (SDLC) stages starting from Requirements Management and extending to Production support/ Post-production support and covers

- Application Development, Integration & Maintenance
- Application Lifecycle Optimization
- Application Modernization Services
- Application Outsourcing
- ETL and BI Services
- Quality and Testing
- Deployment and Implementation

In a typical AD system Value source can provide depth and breadth of capabilities in delivering business results in:

1. Project and Program Management
2. Product or Project Design Services
3. Sub Contracting
4. Construction
5. Construction Coordination
6. Construction Contract Administration

1. Program and Project Management – ValueSource India can undertake the guidance of project and project-related activities from start to finish. This is accomplished through use of their application domain knowledge, skills, tools and processes in order to meet or exceed stakeholder needs and expectations from the project.

2. Design -Ranging from basic to Enterprise Architecture Design - The solution to the owner's project needs in the form of design can be provided by ValueSource India either in-house or through third parties and the project construction completed as per specifications

3. Sub Contracting – Where there is a constraint of capacity, ValueSource India can arrange sub-contractors and supervise them for the construction work required to deliver the project.

4. Construction – ValueSource India can also execute the project in a more hands-on way by building the project code using their developers.

5. Construction Coordination (Project Coordination or Program Management) – ValueSource India can also Orchestrate or direct performance of various parallel projects by their own team and/or by contractors during the course of the project's construction.

6. Construction Contract Administration - The servicing of contracts for construction is held by contractors and can be supervised by ValueSource India.

**THE SOLUTIONS**

ValueSource India solutions for Delivery AD are focused on following capabilities:

**Designing Solutions**

- Requirements management
- Business process modeling
- Design artifact management
  - Application design
  - Interaction and interface design
  - Data and program/services modeling
- Test management

**Building Solutions**

- Development artifact management
  - Code editing
  - compiling
  - debugging (various)
  - Test management
  - automation

**Deploying Solutions**

- Service contract management for
  - Capacity planning
  - Runtime configuration
  - Test management
  - Automation
  - Identity management
  - Directory management
  - Security infrastructure
  - Core Services infrastructure
  - Monitoring agents
  - Problem diagnosis

**Assuring Quality of Solutions**

- Service level management for
  - Infrastructure monitoring
  - Service level monitoring
  - Reporting

- Infrastructure optimization
- Diagnosis
- Auditing
- usage Tracking
- Software Delivery
- Patch Management

**Domain Skill Areas**

- Insurance
- Banking

**Why ValueSource India**

- ValueSource India is a subsidiary of KBC Bank, Belgium and the offshore development partner for KBC Bank.
- ValueSource India has the right experience and methodology of a software company to handle Application development (AD) services starting from end to end software development, Maintenance and Enhancement needs.
- ValueSource India is capable of applying its extensive experience obtained from earlier Application Outsourcing initiatives to your requirements.
