

#### Fact sheet short description

The capabilities and the process methods followed by ValueSource India for the development process are highlighted in this fact Sheet

---

### About Us

ValueSource India currently offers application development services to KBC group, one of the largest banking & insurance groups in Europe.

### RBD Environment

Enterprise Generation Language (EGL) is a Fourth Generation Language from IBM. A structured programming approach, it supports rapid and simplified development of applications complying with Service Oriented Architecture (SOA). The EGL code can be generated in Java or COBOL which makes it platform independent.

Rational Business Developer (RBD) is the workbench for the EGL development. The RBD tool collaborates and shares resources using built-in Clear-case version and/or using standard plugins.

### APPLICATION DEVELOPMENT

ValueSource India has knowledge and experience in developing state-of-the-art application various environments.

We have expertise in all phases of SDLC including requirement Analysis, Application design (Functional and technical), EGL development, Debugging in RBD environment, Unit testing the generated code and software implementation.

The ValueSource India follows universal industry standards for the development and deployment.

### RBD Experience

With more than 45000 man hours of RAD/EGL development done in ValueSource India in the last 1 year, we are a strong leader in the EGL application development world. With our industry standard processes and highly experienced resources we can deliver high quality products and services consistently.

### EGL Center of Excellence (EGL CoE)

With so much of EGL expertise in the company, ValueSource India started the Center of Excellence in the year of 2008. The CoE consists of experienced EGL developers and EGL lead users. The primary idea of this group is to provide design, development support to the project teams. The CoE also arranges knowledge sharing sessions and has promoted forums through which the knowledge is shared to other EGL developers across the organization

### INSTALLATION AND DEPLOYMENT SUPPORT

Our 'lead users' are trained in installing EGL software and applications. Our high quality and experienced support team can provide world class installation / deployment support.

### Key Strengths

The ValueSource India is one of the pioneers in adopting the state-of-the-art EGL technology for application development. With highly qualified trainers and developers, the ValueSource India is fully

geared up to provide services in the following areas:

**Skill Areas**

- Functional Design
- Technical Design
- Build and Unit Test
- Testing
- Implementation

**Process Skill Areas**

- SDLC - Waterfall Development
- Iterative Methodology (e.g. Agile/Scrum)
- Build and Test
- Quality Processes

**Domain Skill Areas**

- Insurance
- Banking

Rational Business Developer, Rational Clearcase, EGL and VisualAge Generator are trademarks or registered trademarks of IBM Corporation

**Why ValueSource India**

- ValueSource India is a subsidiary of KBC Bank, Belgium and the offshore development partner for KBC Bank.
- ValueSource India has the right experience and methodology of a software company to handle end to end software development, maintenance and Enhancement needs.
- ValueSource India is capable of applying its extensive experience obtained from earlier Application Outsourcing initiatives for your Projects.

<b>Lexicon</b>	
RAD	: Rational Application Developer
RBD	: Rational Business Developer
EGL	: Enterprise Generation Language
4GL	: Fourth Generation Language
ClearCase	: Open system based Version Controller
VAG	: VisualAge Generator
SDLC	: Software Development Life Cycle
Agile	: An iterative development methodology
Scrum	: An iterative development methodology
<b>Key Benefits</b>	
 <ul style="list-style-type: none"> <li>• Unicode Compliance</li> <li>• Platform independence</li> <li>• Portability between legacy and open systems</li> <li>• One stop Service for requirement to implementation</li> </ul>
